PRESS RELEASE

System Engineering And Laboratories (SEAL) launches a blog featuring tales from the “Consultant”!

Tyler, Tx, August 9, 2012: System Engineering And Laboratories (SEAL) has launched a blog that can be accessed from the icon at the bottom of the new website.

The blog will feature stories and information showcased in our quarterly newsletter, “Consultant” in condensed easy to read form with links to the original full length articles. It will offer a great introduction to valuable information on forensic engineering and the latest industry news affecting insurance companies, SIU departments, government agencies, manufacturers, and law firms. Plus your chance to win a \$100 visa card every quarter!

To register for the blog or newsletter visit www.sealcorp.com or visit the blog directly where you can also register at www.sealconsultant.blogspot.com.

###

System Engineering And Laboratories (SEAL) has been providing services including forensic engineering, expert witness, certified fire, arson, and accident investigations, safety engineering, and product testing for over thirty (30) years. Our goal is to provide you with an independent source for forensic engineering, accident and fire investigations, with laboratory and testing capabilities that support our customers from the first field investigation through expert testimony. SEAL is a family owned and operated business headquartered in Tyler, Texas.
